New Product - Coiled Tubing BOP
Well Intervention Technology

Features
- Rapid closure time
- Balanced Piston Design System, no additional load delivery system required
- Single open/single close line hookup
- Integral Hydraulic Opening System
- API Integral Flange Connection
- API Side Port
- Interchangable Actuators
- Equalising Blocks

Benefits
- Minimal leak paths
- Balanced Piston Design increases shearing capabilities
- Manual closure under well bore pressure
- Reduced spares with simplified maintenance
- Hydraulically assisted re-dress

Hunting’s Coiled Tubing BOP provides wellbore isolation, protection against blow-outs and secures the well in an emergency. The balanced piston design system increases shear capabilities.

Hunting’s Coiled Tubing BOP has been designed and tested in accordance with API 16ST, API 6A, 16A, NORSOK D-001, D-002, D-010 and NACE MR0175.
